DESIGN STUDIES

Index to Volume 4, Numbers 1–4, 1983, pp 1–264

SUBJECT INDEX

A

A chemical engineering design view of biotechnology 208
Architectural complexity and contradiction: a fuzzy set-theoretic basis and viewpoint 202
Architectural theory 215
Architecture 124, 202
Architecture and behavioural research: a critical review 76
Assembly design 170
Automatic handling 170

B

Bauhaus 43
Behaviour 76
Biotechnology 208

Books and Publications

ACARD Facing international competition: the impact on product design of standards, regulations, certification and approvals 196
Alexander, C The Linz cafe 196
Arnold, E and Senker, P Designing the future — the implications of CAD interactive graphics for employment and skills in the British engineering industry 198
Baker, M J Market development: a comprehensive survey 258
Behaviour and information technology Vol 1 No 1 71
Bessant, J Microprocessors in production processes 71
Cottle, T and Woudhuysen, T Central to design — central to history 261
Gibbs, L M Love canal: my story 71
Russel, B Building systems industrialization and architecture 197
The education of the engineer for innovative and entrepreneurial activity 1982 71
VDI 2234: Economic basics for the designer 259
Wolff, J Aesthetics and the sociology of art 261

British Standards 151
Building design 76, 84, 100

C

Categories in architectural theory and design: derivation and precedent 215
Chemical engineering 208
Classification 215
Computer graphics 35

Conference and Exhibition Reports

Design Research Society seminar 199
Design 82, EFCE Event No 265 67
EDRA 14 (Environmental Design Research Association) 263
Ergonomists, product designers and ecumenism 142
Kenneth Grange at the Boilerhouse 262
PAPER (People and physical environment research) 263
Who designed the Sierra? Pictures from an exhibition 65
25 years of the UK Consumers' Association 68

Continuous design and redesign 53

D

Design 115, 233
Design and production 13
Design for assembly 170
Design for cost manufacture in West Germany 245
Design history 43
Design methods 53
Design philosophy 147
Design tactics = methods + working principles for design engineers 188
Determination of optimal dimensions for a city car using methodical design with prior technology analysis, The 233

E

Education 21, 43, 100, 115, 155
Educational background to the Bauhaus, The 43
Engineering 21, 147, 155, 158, 161, 177
Engineering design management in French industry 158
Environment 84
Environment psychology 76
Evaluation 92, 100, 115, 202, 215
Experience 21

F

Facilitating experiential learning in environmental design 115
Facing international competition 151
Flats fit for families: an evaluation of post-occupancy evaluation 92
France 158
Functional analysis 233
Fuzzy sets 202

H

Habitability framework: a conceptual approach towards linking human behaviour and physical environment, The 84
Habitats 92
How to handle an image 35
Human behaviour 84
Hypergames and design decisions 227

I

Image handling 35
Industry 13
Intellectual understanding of engineering design 147
Interaction 227

M

Makeability 161
Management 155, 158
Marketing 3
Mechanical system 233
Methodology 177

N

Need assessment: a way of improving the value of new products 183

P

Philosophical categorization
Place of design in the training of professional engineers and managers, The 155
Plastics products: successful firms, innovation and good design 3
Problem analysis 227
Process plant design 208
Product design 3, 151
Product evaluation 183
Product specification 13
Proposal: for the Southern half of the globe 61

Q

Quality control 151

R

Redesign 53
Research 92
Researching the design/production interface: product specifications 13
Ritual 124
Role of design in product and process change, The 161

S

Skills and practices of engineering designers now and in the future, The 21
Software 53
Spatial oppositions 124
Spatiosymbolic oppositions in ritual and architecture 124
Synopses of some recent published studies of the design process and designer behaviour 133
Systematic design 177

T

Teaching design evaluation, with results from case studies of playgrounds, schools, and housing for the elderly 100
Techno-economic product designing 177
The determination of optimal dimensions for a city car using methodical design with prior technology analysis 233
The habitability framework: a conceptual approach towards linking human behaviour and physical environment 84
The intellectual standing of engineering design 147
The place of design in the training of professional engineers and managers 155
The role of design in product and process change 161
'Third area' 147

U

User needs 183
User/producer interaction 161

V

Value analysis 183

W

Worksheet compilation 170

2D images 35

AUTHOR INDEX

A
Andersen, S Need assessment: a way of improving the value of new products 183

B
Bennett, P G see Huxham, C S 227

C
Capon, D S Categories in architectural theory and design: derivation and precedent 215
Cross, A The educational background to the Bauhaus 43

D
Doxtater, D Spatio-symbolic oppositions in ritual and architecture 124

F
Francesco, di G see Pighini, U 233

G
Gardiner, P see Rothwell, R 161
Garrott, J G Facilitating experiential learning in environmental design 115
Gero, J S see Oguntade, O O 202
Gregory, S A Design for cost manufacture in West Germany 245
Gregory, S A see Smith, E L 208
Grotloh, K and Rothlin, E Techno-economic product designing 177

H
Harris, A The intellectual standing of engineering design 147
Harris, H G The place of design in the training of professional engineers and managers 155
Hubka, V Design tactics = methods + working principles for design engineers 188
Huxham, C S and Bennett, P G Hypergames and design decisions 227

J
Jones, J C Continuous design and redesign 53

L
Lawrence R J Architecture and behavioural research: a critical review 76
Lera, S Synopses of some recent published studies of the design process and designer behaviour 133
Lindley, B C Facing international competition 151

M
Marmot, A F Flats fit for families: an evaluation of post-occupancy evaluation 92
Moore, G T Teaching design evaluation, with results from case studies of playgrounds, schools, and housing for the elderly 100

O
Oakley, M H and Pawer, K S Researching the design/production interface: product specifications 13
Oguntade, O O and Gero, J S Architectural complexity and contradiction: a fuzzy set-theoretic basis and viewpoint 202

P
Papanek, V Proposal: for the Southern half of the globe 61
Pawer, K S see Oakley, M H 13
Pighini, U, Francesco, di G, Yuan, D Z, Schettino, A V and Rivalta, A The determination of optimal dimensions for a city car using methodical design with prior technology analysis 233
Pitts, G Engineering design management in French industry 158
Preiser, W F E The habitability framework: a conceptual approach towards linking human behaviour and physical environment 84

R
Redford, A H Design for assembly 170
Rivalta, A see Pighini, U 233
Rothlin, E see Grotloh, K 177
Rothwell, R and Gardiner, P The role of design in product and process change 161

S
Schettino, A V see Pighini, U 233
Scrivener, S How to handle an image 35
Smith, E L and Gregory, S A A chemical engineering design view of biotechnology 208

W
Walsh, V Plastics products: successful firms, innovation and good design 3
Wilde, G L The skills and practices of engineering designers, now and in the future 21

Y
Yuan, D Z see Pighini, U 233
